HALACHOT - LAWS OF MEDICINES, COSMETICS & TOILETRIES

*This list does not verify the general kashrut of
medications, lipsticks or personal care products.*

It only relates to its non-chametz status.

Items must be purchased in the exact form they are named.

*Cette liste ne certifie pas la cachrout générale des médicaments, des
rouges à lèvres ou des produits de soins corporels. Elle se rapporte
uniquement au statut non 'hamèts des produits qui y sont mentionnés.*

*Ces articles doivent être achetés selon la formulation précise par
laquelle ils ont été nommés.*

All medications for a heart condition, diabetes, abnormal blood pressure, stroke, kidney disease, lung disease, depression, the immune system (transplant anti-rejection) and cancer treatment (including precautionary) must be taken on Pesach. No one should refrain from taking any required medication, even if it contains chometz, without first consulting his or her physician and Rabbi.

*All medications in pill or tablet form which are swallowed and which taste bitter or bland (when the pill is licked) are permitted.

*All medicated drops for ear, eye or nose only, including injections, ointments, powders (talc and cornstarch), foot powders, and inhalers may be used. If products contain cornstarch one should wash their hands before touching food.

*See list for vitamins and food supplements.

*Over the counter pills, liquid and chewable medications that may contain Chametz should only be used under the direction of a Rabbi together with a doctor who will determine the severity of an illness and the possibility of substituting medication.

*Liquid and chewable medications that may contain Kitniyot may be taken by someone who is ill. An otherwise healthy person who only has a slight discomfort should only use medication in non-chometz tablet form.

Tout médicament relatif aux maladies cardiaques, au diabète, à une tension artérielle anormale, à une attaque d'apoplexie, à une maladie des reins ou des poumons, à la dépression, au système immunitaire (pour prévenir le rejet d'une greffe) et au cancer (même à titre préventif), est autorisé à Pessa'h. Personne ne doit s'abstenir de prendre un médicament requis - même si ce dernier contient du 'hamèts - sans avoir consulté au préalable son médecin et son rabbin.

*Tout médicament sous forme de pilule ou de comprimé que l'on avale ou qui a un goût amer ou fade lorsqu'on le suce, est autorisé.

*Toutes les gouttes médicamenteuses utilisées uniquement pour les oreilles, les yeux, ou le nez, les injections, les pommades, les poudres – talc, amidon de maïs, poudres pour pieds, etc. - et les inhalateurs, sont permis à Pessa'h. Si ces produits contiennent de l'amidon de maïs, on devra se laver les mains avant de toucher un aliment quelconque.

*Les vitamines et suppléments alimentaires ne sont pas forcément classés dans cette catégorie de médicaments. De ce fait, il convient de consulter son rabbin.

*Les comprimés vendus sans prescription et les médicaments à boire ou à mâcher qui pourraient contenir du 'hamèts, ne doivent être utilisés qu'avec l'autorisation d'un rabbin et d'un médecin qui, eux, évalueront la gravité de la maladie en question et la possibilité de remplacer ces médicaments par d'autres qui ne contiennent pas de 'hamèts.

*Les médicaments à boire ou à mâcher qui pourraient contenir des Kitniyot (légumineuses) peuvent être pris par un(e) malade. Toutefois, une personne qui est en bonne santé et qui n'éprouve qu'un léger malaise, pourra prendre uniquement un médicament sans 'hamèts, sous forme de comprimé.

LIST OF OVER THE COUNTER PRODUCTS WHICH ARE ACCEPTABLE FOR PESACH

DO NOT DISCONTINUE USE OF ANY MEDICATION WITHOUT CONSULTING A RABBI OR DOCTOR
Ne pas interrompre l'usage d'un médicament sans consulter un rabbin ou un médecin
